

### Evergreen Fibreboard Bhd

Source: RHB, Bloomberg

Evergreen Fibreboard was testing the MYR1.13 level in its latest session after crossing above the 50-day SMA line. The stock may experience a further technical rebound if it crosses above this point in the near term, with a target price of MYR1.30, provided the MYR1.20 level can be surpassed. However, it will turn sideways if the MYR1.13 mark cannot be breached. Support may be found at MYR1.06 where traders can exit upon a breach to avoid the risk of a further correction.
